An opportunity for parents of special needs children, ages birth—21, to discover the wonderful RESOURCES that the Concho Valley has to offer.

You will have the opportunity to hear success stories from parents and their special needs child, and hear first hand how they managed and used their area resources to assist their child in independent living skills, attending college, and/or entering the workforce.

A panel of area professionals will also be present and will provide resources and contacts from within the community.

TACV
